Business Requirement & Functional Acceptance

I/We hereby verify that this Business Requirement & Functional consist of all the requirements requested by BANK SIMPANAN NASIONAL. The implemented system will fulfill ONLY this requirement.

I/We also hereby AGREE that this satisfies our entire requirement for **Enhancement of Expired Password Flow, Email Content And Eye Icon To Password Field**. Any future changes to this agreed scope would be treated as an enhancement to the system. Any future changes to the project timeline will be subjected to the final approval of the project steering committee.

Section A: Introduction

1 Introduction

This document served as the business requirement and system specification of implementing **Enhancement of Expired Password Flow, Email Content And Eye Icon To Password Field** in BSNeBiz and IBAM system, which is customer able to make monetary transaction to Own Account, Intrabank and Interbank Account via online.

This document shall explain all the features and functionalities, which is elaborating with screen captures, process flow, descriptions, input fields specifications and error messages. **All screen designs provided in this document are samples and only illustration purpose for easy understanding. The screen designs are not final.**

1.1 Objective

The objective of this document is to capture user requirements of transactional and administration modules of implementing **Enhancement of Expired Password Flow, Email Content And Eye Icon To Password Field**. This document will facilitate development and implementation of the mentioned modules of Internet Banking System for BSNeBiz.

The base line features description and screen designs will become a reference blueprint for the development team to develop the transactional and administration module. Hence, it is crucial that all stakeholders need to ensure the correctness and adequacy of the requirements captured in this document.

All stakeholders involved are expected to review and sign off this document before the development start. By signing off the document, the stakeholder has endorsed the correctness and accuracy and adequacy of the requirements documented in this document.

1.2 Assumptions

Enhancement Of Expired Password Flow, Email Content and Eye Icon To Password Field.

This module will enhance the expired password, email content and add eye icon for BSNeBIZ Web, BSNeBiz Mobile Application and IBAM.

1. Expired Password Flow

There will be no more utilization of the Forgot Password step for expired password status. When a user attempts to log in, the system will detect their expired password status and prompt them to change it.

2. Email Content

To update email content at database to the given text.

3. Eye Icon Password Field

To add eye icon at BSNeBiz Web, BSNeBiz Mobile and IBAM. Users can utilize the 'eye' icon next to the password field. With just one click on the eye icon, users can toggle between displaying and hiding their password, providing them with visual confirmation and control over the characters they input.

1.3 Impact Modules

To update impact module section

System	Modules	Features	Description
BSNeBiz	Password Flow	Module	<ul style="list-style-type: none"> To change the user's BSNeBiz password updating flow after it has expired.
	Email Content	Table	<ul style="list-style-type: none"> To update the current email content for a temporary password
	Eye Icon	Field	<ul style="list-style-type: none"> To update current Login screen by adding “Eye” icon with one time click to allow user to view entered password and OTP. <ul style="list-style-type: none"> - BSNeBiz Login Screen - BSNeBiz > Update Security Module
BSNeBiz Mobile	Eye Icon	Table	<ul style="list-style-type: none"> To update current Login screen by adding “Eye” icon with one time click to allow user to view entered password. <ul style="list-style-type: none"> - BSNeBiz Mobile Login Screen
IBAM	Eye Icon	Field	<ul style="list-style-type: none"> To update current Login screen by adding “Eye” icon with one time click to allow user to view entered password. <ul style="list-style-type: none"> - IBAM Login Screen

Table 1: Enhancement of Expired Password Flow Email Content and Eye Icon at Password Field Impact Module

2 Secure Verification for Monetary Transaction at BSNeBiz

PIN is required as the second level security authentication for BSNeBiz Role’s Single User and Approver when perform any monetary transactions via online. PIN is a six random digits temporary security code, which is generated and verified by the authentication server.

There are two types of Secure Verification assign to the user by Corporate Admin:

- A. Hardware Token (Vasco)
- B. Mobile Token

2.1 Hardware Token (Vasco)

Hardware token from VASCO is physical device that will be used by Single User and Approver to authorize a monetary transaction using the “Transaction Singing” function; also known as Challenge Response (CR).

2.1.1 Process Flow

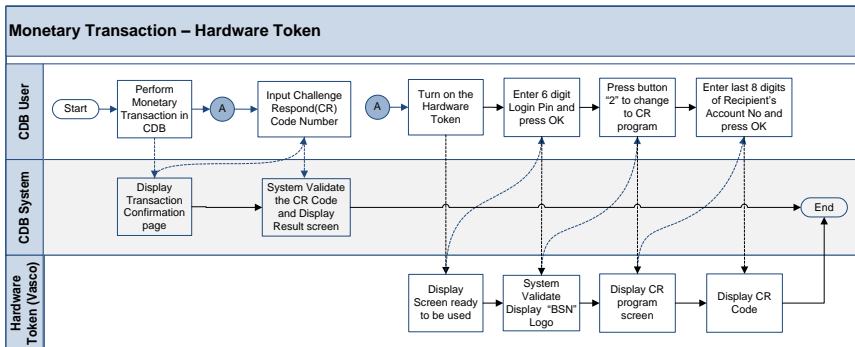

Diagram 1: Hardware Token Flow Diagram

2.1.2 Screen Flow

Step 1:

1. When user in Transaction Confirmation page, BSNeBiz system will required Challenge Response code to proceed the transaction
2. User needs to use Hardware Token to generate the Challenge Response code.

Figure 1: Hardware Token

Step 2:

1. Users press OK button for 2 seconds to turn on the Token.
2. User key in the 6 digits login PIN (User Password) and press OK.
3. BSN logo will be displayed on the token screen.

Figure 2: Turn on Token Flow

Step 3:

1. User press button 2 to change to Challenge Response program.

BRFD: CR23005 – Enhancement of Expired Password, Email Content and Eye Icon for password field

2. User key in the last 8 digits of recipient account number for Challenge Response.
3. Press OK and Challenge Response code will be displayed.

Figure 3: Get Challenge Response Code Flow

Step 4:

1. User use generated Challenge Response from the Token and input to the Challenge Response field in BSNeBiz – Transaction Confirmation pages.

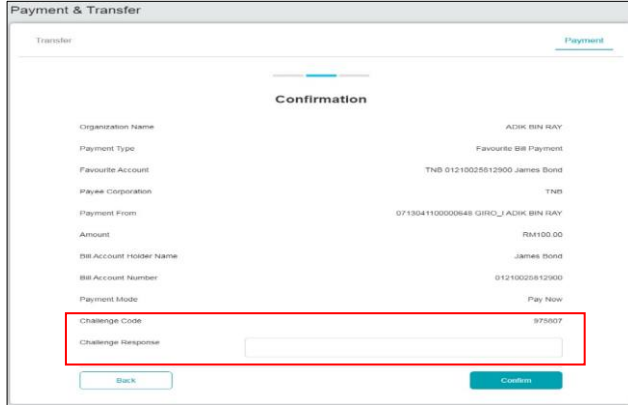

Figure 4: Confirmation page for Hardware Token verification

2.2 Mobile Token

Mobile Token is a mobile application that has the same functionalities as the VASCO Hardware Token using mobile phone features and serves the same usage purpose.

2.2.1 Process Flow

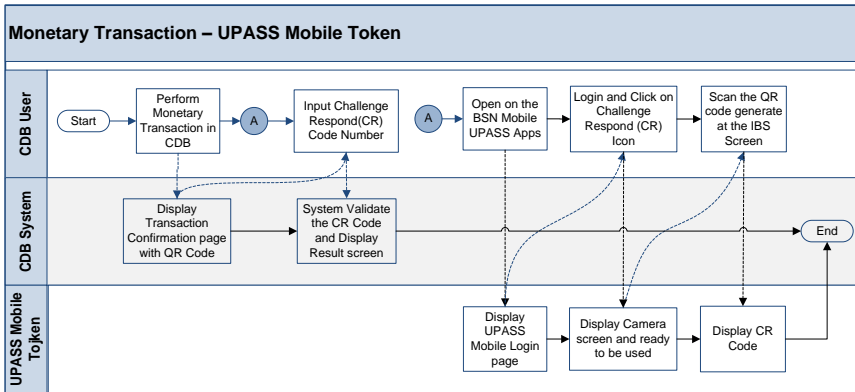

Diagram 2: Mobile Token Flow Diagram

2.2.2 Screen Flow

Step 1:

1. When user in Transaction Confirmation page with QR code.
2. User needs to use Mobile Apps to scan the QR code to generate the Challenge Response code.

Figure 5: Mobile Apps screen

Step 2:

1. User Login to the Mobile apps and Click on Challenge Respond icon.
2. User scans the QR code generated at IBS confirmation screen.

Figure 6: Mobile Apps QR Scan screen

Step 3:

1. BSN Application generate and display the Challenge Response code to be used.

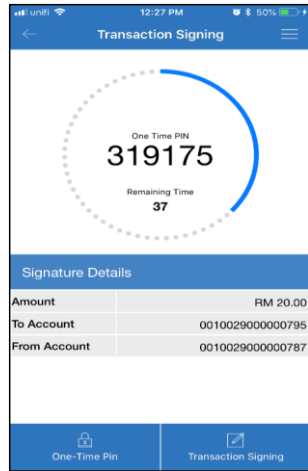

Figure 7: Challenge Response Code display Screen

Step 4:

1. User use generated Challenge Response from the Mobile Token App and input to the Challenge Response field in BSNeBiz – Transaction Confirmation pages.
