Subject: Group Management Issue

Mr. Teo,

Under Group Management we can control the permission of all module/sub-module either to allow to view, update or delete.

Now we need to allow Audit Group (or Senior Management Group) to access the system as View only access.

We had tried to limit the access to View only for Promotion Module for that group, but when the user use the system, the user only can view the event information and cannot view the company information.
