List of Tables

Table 1 – Administrator Group Access Matrix	15
Table 2 – System Security Requirements	25

1 Introduction

This document describes the features, process flow and screen design administration modules of Retail Internet Banking System.

Following features of Retail Internet Banking Administrations will be captured in this document:

1. First Time Login
2. Admin Group
3. Admin Navigation
4. Admin Enquiry
5. IB User Group
6. RIB Navigation
7. RIB User Enquiry
8. Content
9. Secure Mailbox
10. Security Question
11. RIB Transaction Enquiry
12. Audit Log
13. Change Own Password

1.1 Objective

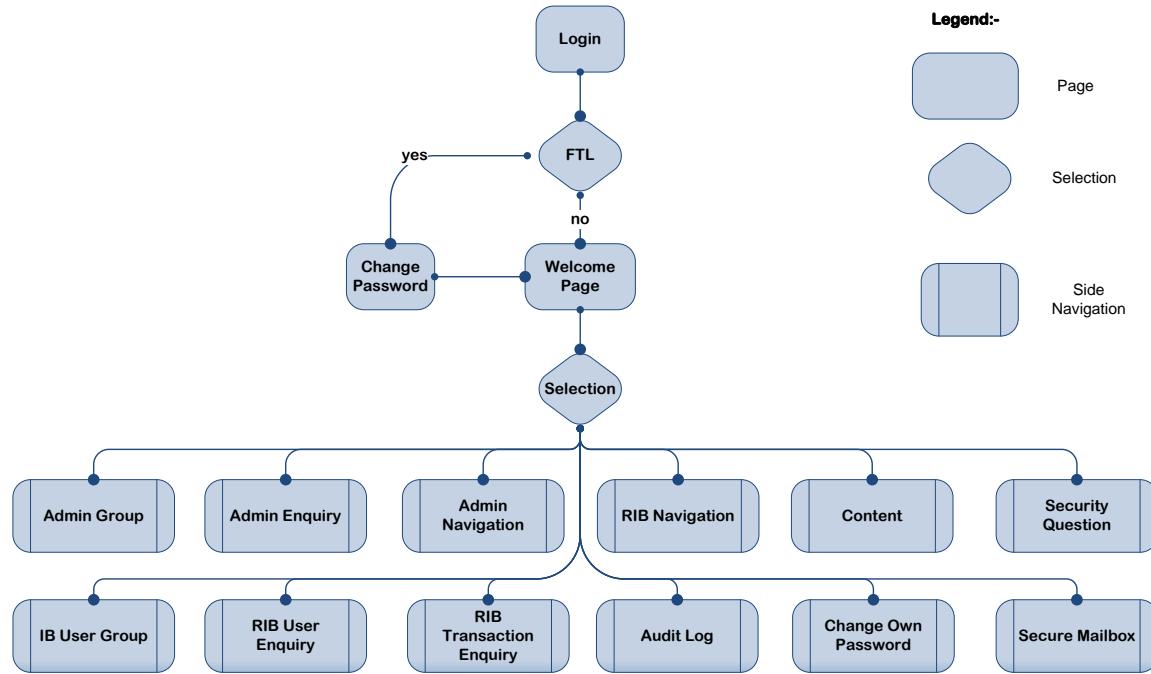

The objective of this document is to capture user requirements Internet Banking Application Manager (IBAM) for AGROBANK. This document will facilitate development and implementation of the mentioned application for AGROBANK.

The base line features description, process flows and screen designs will become a reference blueprint for the development team to develop the transactional, registration and administration module. Hence, it is crucial that all stakeholders need to ensure the correctness and adequacy of the requirements captured in this document.

All stakeholders involved are expected to review and sign off this document before the development start. By signing off the document, the stakeholders have endorsed the correctness and accuracy and adequacy of the requirements documented in this document.

2 IBAM Page Flow Overview

Below diagram shows the overall view of the IBAM system page flow. The detail of each function will be described in respective section.

3 First Time Login (FTL)

3.1 Features Description

IBAM shall detect first time login user. If the user is identified as the first time login user, the system shall force the user to go through the change password process. After user changed the password, the system shall direct the user to the IBAM landing page.

3.2 Process Flows

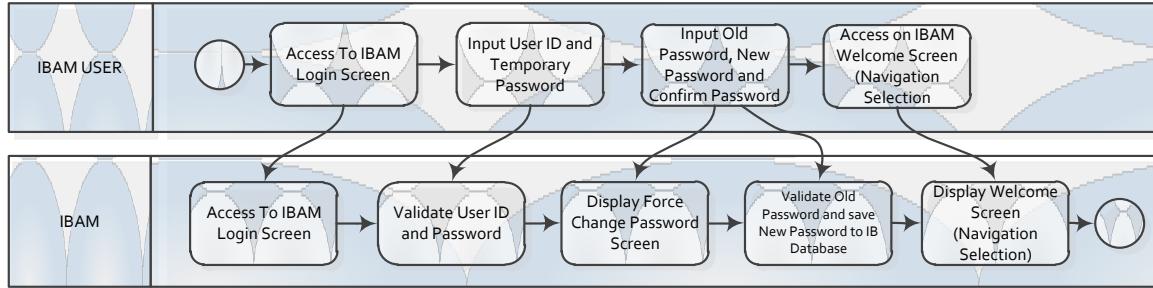

Diagram 2 – First Time Login Flow Diagram

There are two participants involved in this process, which are User and IBAM. The following are the steps to do FTL:

Step 1:

1. User access to Login Screen.
2. IBAM display Login Screen.
3. User input the User ID and temporary Password.
4. IBAM validates the User ID and Password.

Step 2:

1. IBAM display the Force Change Password Screen.
2. User input the Old Password, New Password and Confirm Password fields.
3. IBAM validates Old Password and save the New Password to IB Database.

Step 3:

1. IBAM display the result page.
2. User click on the proceed button to go to the welcome page.

3.3 Screen Flow

Step 1

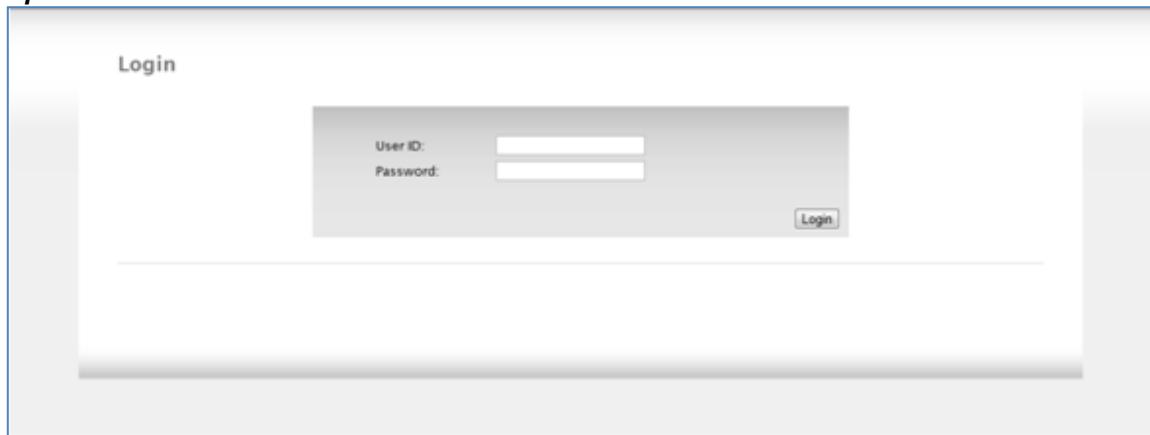

Figure 1 – Login Screen

1. User access to IBAM Login Screen.
2. IBAM display IBAM Login Screen.
3. User input User ID and password and click the “Login” button.
4. IBAM validates the User ID and password to determine whether this is an FTL action. If it is, go to the force change password screen, see Step 2.

Step 2

Force Change Password

Old Password:

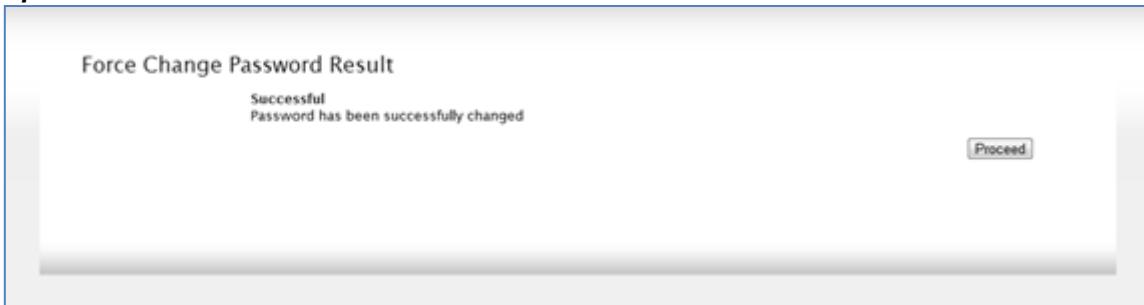

New Password:

Confirm Password:

Figure 2 – Force Change Password Screen

1. User fills in the Old Password, New Password and Confirm Password fields and clicks on the “Change” button.
2. IBAM validates Old Password and save the New Password to IB Database and display the result screen to the user, see Step 3

Step 3

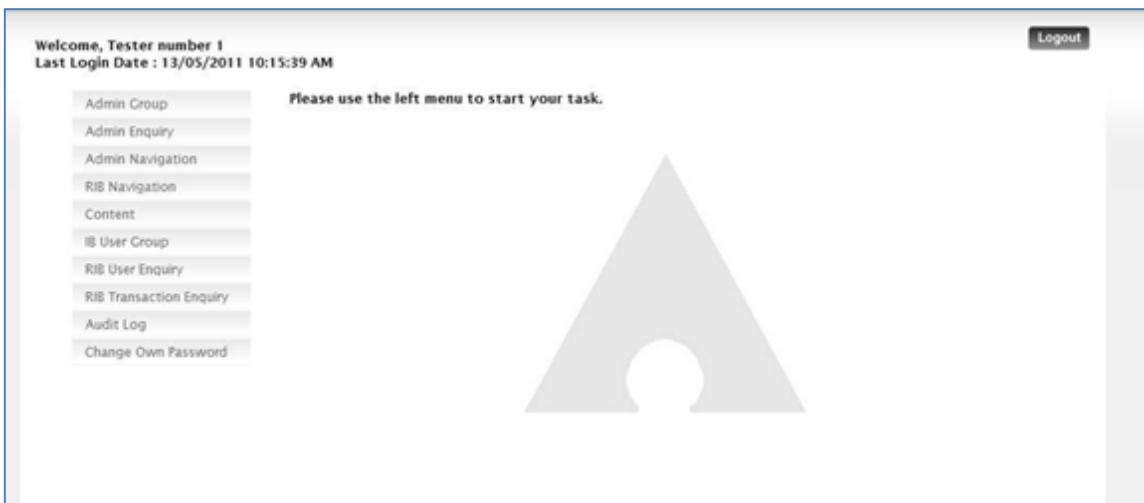

Force Change Password Result

Successful
Password has been successfully changed

Figure 3 – Force Change Password Result Screen

1. User click on the “Proceed” button to go to the welcome page below:-

Welcome, Tester number 1
Last Login Date : 13/05/2011 10:15:39 AM

Step 3:

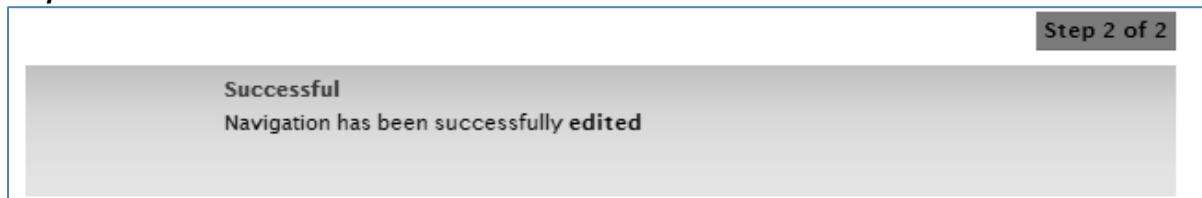

Figure 15 – Admin Navigation Edit Result

1. IBAM System shows that the 'navigation has been successfully edited'

4.3 Managing administrator

4.3.1 Create administrator

4.3.1.1 Features Description

This feature shall allow administrator to create admin user based on the created group.

4.3.1.2 Process Flow

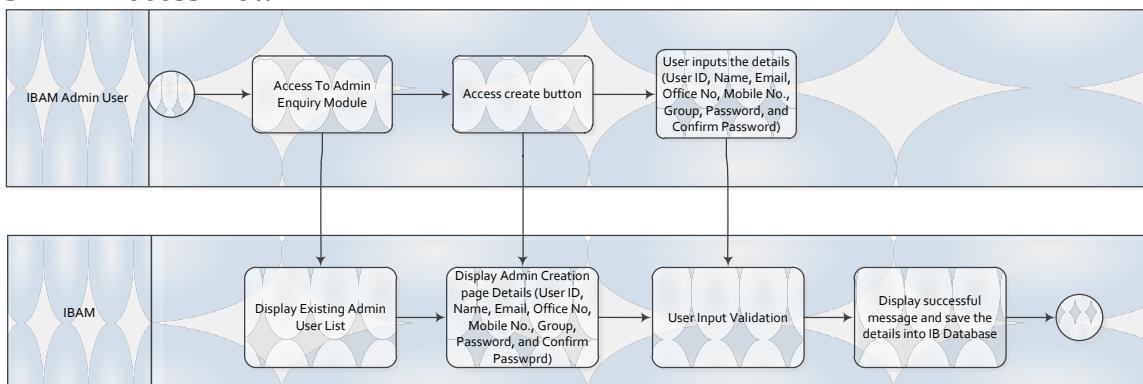

Figure 16 – Create Administrator Flow Diagram

There are 2 participants involved in this process which is Admin User and IBAM. The following are the steps to create a new IBAM user:

Step 1:

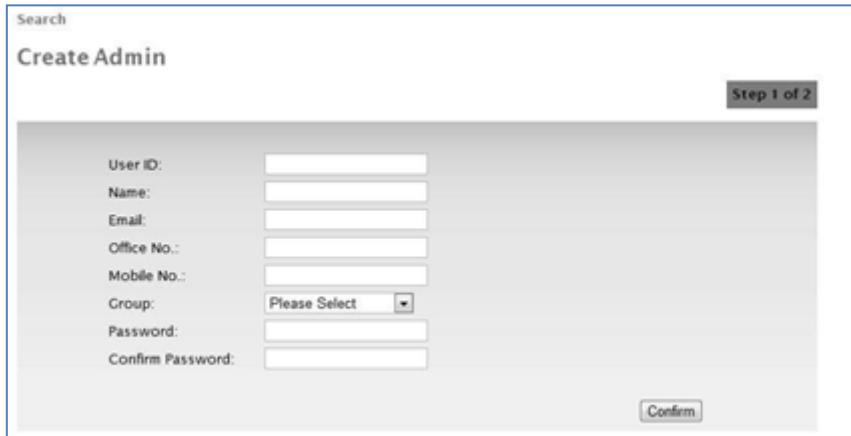

1. Administrator access to IBAM Creation Screen.
2. IBAM display User Creation Screen.
3. Administrator input new Administrator Details and clicks on Confirm button.

Step 2:

1. IBAM validate input details and save the new administrator to IB Database and go to the result page.

4.3.1.3 Screen Flow

Step 1

The screenshot shows a web-based application interface titled "Create Admin". At the top right, it says "Step 1 of 2". The form contains fields for User ID, Name, Email, Office No., Mobile No., Group (with a dropdown menu showing "Please Select"), Password, and Confirm Password. A "Confirm" button is located at the bottom right of the form area.

Figure 17 – Administrator Create Screen

1. Administrator can access to Admin Creation Screen by clicking on the “Admin enquiry” link at the left navigation menu followed by clicking the “Create” button.
2. On the Admin Enquiry Screen, input preferred User ID, Name, Password, Re-enter Password, select a Group, Email, Office No., Mobile No., and then click on the “Confirm” button.

Please to refer **Error! Reference source not found.** for the default settings of each group. Validation of User ID and password is based on the System Security Requirements table below.

System Security Requirements

Below table shows the requirement for the User ID and Password for AGROBANK:

User ID and Password Control	Minimum Requirements	Remark
1. User ID	Single or combination of numeric, alpha or alphanumeric.	The rule is not parameterized.
2. Maximum password expiration	90 days system must force change	System wide support and can be parameterized via configuration file
3. Minimum password length	8 characters minimum	This is standard feature.
4. Maximum failed log-in attempts	3 times Maximum attempts after which the User ID must be locked out (disabled)	The number of times of maximum attempts can be parameterized via configuration file. If the user ID is locked, the user required to send a request to administrator to change the User Status back to “Normal”. The IBAM will not force the user to change password upon user login.
5. Inactive/Dormant ID for more than 30 days	User ID is disabled by system	The number of days can be parameterized via configuration file.
6. Duplicate password control	For a minimum of 6 generations, same passwords cannot be repeated	The number of generations can be parameterized via configuration file.

User ID and Password Control	Minimum Requirements	Remark
7. Last sign on information display	Preferably system to display the last sign on information to user upon sign on to system	This is standard feature.
8. First time sign on password must be forced change	First time sign on-user must be forced to change the defaulted passwords	This is standard feature.
9. Changing of passwords by user	Users may change their passwords at anytime they wish	This is standard feature.
10. Passwords composition	Must be combination of alphanumeric, special characters, lower/upper case (if possible)	This is standard feature. The password must be combination of at least 1 alphabet and 1 numeric value and case sensitive.
11. Deletion of User IDs from application	User IDs that are obsolete must be able to be deleted (instead of just suspended) from the application	The same user id cannot be reuse even for deleted user. The deleted user will not show on user enquiry screen, but the deleted user record still stored in database.

Step 1:

1. User access Secure Mailbox screen.
2. IBAM System displays the messages in the inbox.
3. User selects the specified message by clicking on the link.

Step 2:

1. IBAM System displays the message details.
2. User views the messages.
3. User can either choose to Reply, Archive or Back.

Step 3:

1. When the user chooses Reply, a compose message screen will appear.
2. User will add the message onto the previous message on the Message field.
3. Click Send after finished keying in the message.

Step 4:

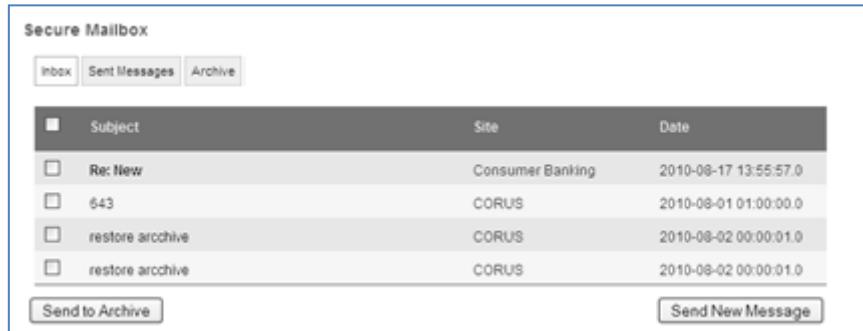

1. IBAM System display Send Message Confirm Screen.
2. IBAM User confirms to Send Message.

Step 5:

1. IBAM System stores the message and recipient.
2. IBAM System displays the Send Message Result Screen.
3. IBAM User views the Send Message Result Screen

5.6.4.2 Screen Flow

Step 1:

The screenshot shows a 'Secure Mailbox' interface. At the top, there are three tabs: 'Inbox' (which is selected), 'Sent Messages', and 'Archive'. Below the tabs is a table listing five messages. The columns are 'Subject', 'Site', and 'Date'. The messages are:

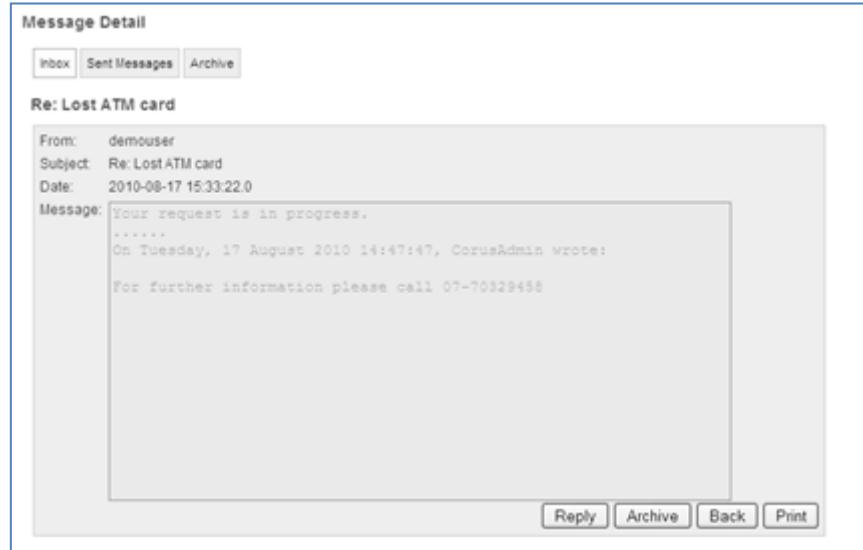

Subject	Site	Date
Re: New	Consumer Banking	2010-08-17 13:55:57.0
643	CORUS	2010-08-01 01:00:00.0
restore archive	CORUS	2010-08-02 00:00:01.0
restore archive	CORUS	2010-08-02 00:00:01.0

At the bottom left is a 'Send to Archive' button, and at the bottom right is a 'Send New Message' button.

Figure 74 – Secured Mailbox Screen

1. User access Secure Mailbox screen.
2. IBAM System displays the messages in the inbox.
3. User selects the specified message by clicking on the link.

Step 2:

The screenshot shows a 'Message Detail' interface. At the top, there are three tabs: 'Inbox' (selected), 'Sent Messages', and 'Archive'. Below the tabs, the subject of the message is 'Re: Lost ATM card'. The message details are:

From: demouser
 Subject: Re: Lost ATM card
 Date: 2010-08-17 15:33:22.0
 Message: Your request is in progress.

 On Tuesday, 17 August 2010 14:47:47, CorusAdmin wrote:
 For further information please call 07-70329458

At the bottom right are four buttons: 'Reply', 'Archive', 'Back', and 'Print'.

Figure 75 – Message Details Screen

1. IBAM System displays the message details.
2. User views the messages.
3. User can either choose to Reply, Archive or Back button

Step 3:

The screenshot shows the 'Reply Mail' interface. At the top, there are tabs for 'Inbox', 'Sent Messages', and 'Archive'. The 'Inbox' tab is selected. Below the tabs, the message header is displayed: To: demouser, Subject: Re: Lost ATM card. The message body contains two identical email signatures from 'demouser' to 'CorusAdmin' at the same date and time. At the bottom right of the message area are 'Back' and 'Send' buttons.

Figure 76 – Reply Message Screen

1. When the user chooses Reply, a Reply message screen will appear.
2. User will add the message onto the previous message on the Message field.
3. Click Send after finished keying in the message.

Step 4:

The screenshot shows the 'Confirm Mail' interface. It has the same layout as Figure 76, with 'Inbox' selected. The message header is identical: To: demouser, Subject: Re: Lost ATM card. The message body contains the same two signatures. At the bottom right are 'Back' and 'Send' buttons.

Figure 77 – Confirm Message Screen

1. IBAM System display Send Message Confirm Screen.
2. IBAM User confirms to Send Message.

Step 5:

The screenshot shows the 'Result' interface. The 'Inbox' tab is selected. A single-line message box displays the text: 'Successful Mail(s) successful sent'.

6.2.4 Maintaining Fixed Deposit Term Definition

6.2.4.1 Create Fixed Deposit Term Definition

6.2.4.1.1 Features Description

This feature allows authorized IBAM user to create a fixed deposit term belongs to each fixed deposit product in product type content.

6.2.4.1.2 Process Flow

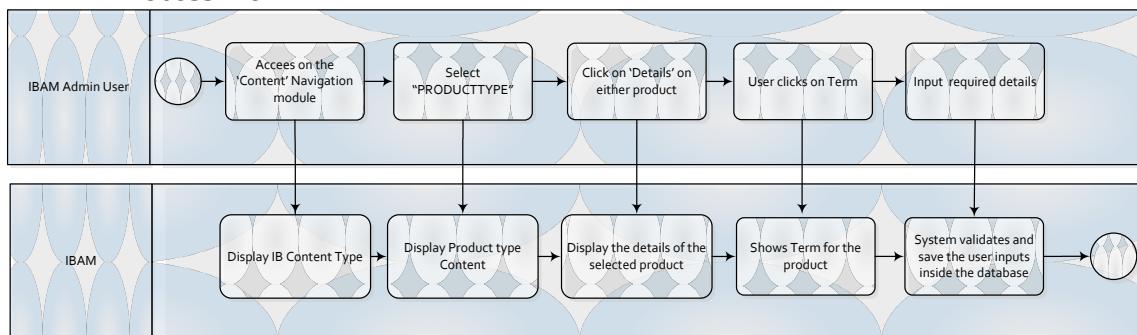

Diagram 34 – Create Fixed Deposit Term Flow Diagram

6.2.4.1.3 Screen Flow

Step 1:

The screenshot shows a web-based application interface. At the top, there is a navigation bar with tabs: 'Service List' and 'TD Term'. The 'TD Term' tab is active, indicated by a blue border. Below the tabs, the page title is 'TD Term'. Underneath, there is a table showing existing term details:

Product Code:	A0
Term Display:	80
Term:	D
Interest Payment Frequency:	30

Below this table are two buttons: 'Delete' and 'Edit'. Further down, there is a section titled 'Create TD Term' containing fields for inputting new term details:

Product Code:	A00
Term Display:	100
Term:	Day
Interest Payment Frequency:	<input type="radio"/> At Maturity <input type="radio"/> Monthly <input checked="" type="radio"/> Upfront

At the bottom right of this section is a 'Done' button.

Figure 113 – Create Fixed Deposit Term Page

1. Within a selected product, clicks on Fixed Deposit Term tab.
2. IBAM displays the available term for the FD product to be used in Retail Internet Banking.
3. IBAM User input the required product code, term display and term for each FD product.
4. IBAM User clicks on “Done” to save the changes.
5. IBAM will save the required term into IB database.

6.2.4.2 Edit Fixed Deposit Term Details

6.2.4.2.1 Features Description

This feature allows authorized IBAM user to edit the available term belongs to each fixed deposit product in product type content.

6.2.4.2.2 Process Flow

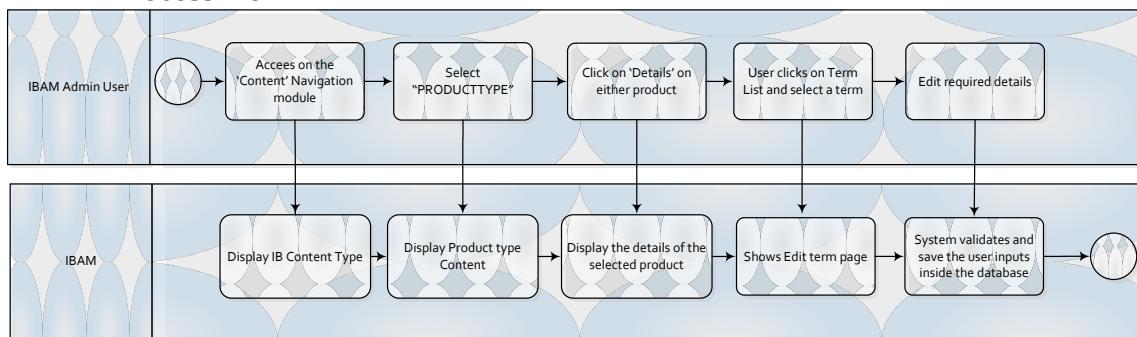

Diagram 35 – Edit Service List Flow Diagram

6.2.4.2.3 Screen Flow

Step 1:

The screenshot shows a two-panel interface. The top panel, titled 'TD Term', displays the current term details:

Product Code:	A0
Term Display:	80
Term:	D
Interest Payment Frequency:	30

Buttons for 'Delete' and 'Edit' are visible. The bottom panel, titled 'Edit TD Term', shows the same fields with input fields for modification:

Product Code:	A0
Term Display:	<input type="text" value="80"/>
Term:	<input type="button" value="Day"/>
Interest Payment Frequency:	<input type="radio"/> At Maturity <input type="radio"/> Monthly <input checked="" type="radio"/> Upfront

Buttons for 'Cancel' and 'Done' are at the bottom right.

Figure 114 – Edit Existing Fixed Deposit Term Page
